Lancaster, PA 17601

**Emerald** is an institutional asset management firm, focusing on small and mid cap equities. They currently manage \$1.6 billion and their clients include the State of Pennsylvania, Pennsylvania State Teachers Retirement Fund, the City of New York, as well as Eastman Kodak. Since the inception of the firm in 1992, they have hired interns from local colleges and universities to aid in their research process. Each intern is initially brought on for a one semester internship and may be asked to stay on for additionally semesters based on performance and availability. The primary duties of their interns are to aid the research staff in fundamental research and analysis of small and mid cap companies. Many of their interns have gone on to work on both Wall Street and inside large corporations.

They will be looking for students interested in a **summer internship** opportunity. The typical background of their interns includes a concentration in Accounting, Finance or Economics, as those areas are essential to the research they perform. Applicants need to have completed their sophomore year in college in order to be considered for this internship.

If you are interested in applying for this internship, please submit your resume to [kains@etown.edu](mailto:kains@etown.edu) by March 23, 2009.

Emerald will begin interviewing for the summer internship in mid-April.
