

Intern - Internal Audit

Job ID: 4777

Location: US-PA-Hershey

Position Type: Intern

More information about this job:

Summary:

DURATION OF ASSIGNMENT: SUMMER - 3 months (full time) and potentially longer (on a part-time basis)

The intern will assist with financial and business process control audits performed throughout the Company. Financial/operational audit assignments would likely include the review of controls and procedures in place within manufacturing facilities, finished goods warehouses, and business processes such as procurement, trade promotion spending, credit and accounts receivable and cash management. The candidate would work extensively with SAP and other information technology systems utilized by the Company.

Responsibilities:

For financial/operational and business process audits, this individual will be responsible for:

- analyzing audit risk and assisting in the development of audit strategies;
- performing audit tests and preparing work papers which document work performed and conclusions reached;
- assessing internal controls and compliance with policies and procedures;
- communicating the results of work performed in oral and written form; and
- executing other audit and administrative tasks as required.

Depending upon the audit schedule, this position may require up to 20% travel to North American facilities. This is an excellent opportunity to learn the many plant, division, and corporate functions and to work with personnel from all levels of the Company. If you are looking for diverse assignments, the opportunity to assume project accountability from start to finish, tasks that will strengthen your oral and written communications skills, and the chance to evaluate system, financial and operational controls, you should explore this opening.

Qualifications:

Education:

Junior or Senior working towards a Bachelor's degree in Accounting, Finance, Information Systems, Business Administration or Information Sciences and Technology.
