

Prevent Junk Mail from Appearing in Your Outlook 2007 Inbox

Situation:

All of a sudden you are getting lots of messages from people you don't know.

Overview:

This is spam. Your address has been harvested from a web site you visited or someone has been infected with spyware or a virus that uses their mailbox to send out junk mail or worse without their knowing about it.

Step by Step Instructions:

View the video on the web by clicking this link.
